Credit Recovery
Prescriptive
Courses

ASSIST Education's Comprehensive Courses support programs that are targeted at keeping students who have not earned required course credits on track for graduation. Students taking courses for credit recovery use the same rigorous, standards-based courses as students engaged in courses for original credit, ensuring that all students are mastering the skills and concepts necessary for their future success. The courses most often needed for credit recovery include pretests that generate individualized learning plans designed to help students recover credits more efficiently and at an accelerated pace.

Easily Identify Student Knowledge

Prescriptive courses include unit pretests that are based on the content standards a student is expected to master. The pretests assess a student's knowledge in each unit of content, identifying what the student has learned and any areas of deficiency. Tightly aligning each item to the standards, the pretests determine an individualized learning plan comprised of the relevant material yet to be mastered.

An individualized learning plan based on pretest results in a Comprehensive Course.

Focus Student Effort with Personalized Learning Plans

An individualized learning plan is automatically generated based on pretest results to direct each student to the specific material he or she has yet to master. The plan is represented visually in the course outline so that each student can clearly see his or her individualized path. Although the course outline highlights the content a student needs to complete, the entire course is always available for the student to access. Individualized learning plans efficiently guide a student's learning, giving educators the confidence that students

Prescriptive Courses Keep You On Track

Courses with the Prescriptive Feature Set include:

- | | | |
|---|---|-----------------------|
| Math | English | Science |
| Algebra I | English 9 | Physical Science |
