

November 2022 ASSIST Feature Updates

Application Merge

ASSIST provides a flexible customizable application for schools. Application information can also be merged with existing student files. The user can select "merge from the application" and view the information on the application and existing information on the student file. This provides the user with easy information and merging data.

The screenshot displays a web interface for merging application and student data. At the top, it shows user details: #1357 DANIEL MARGAL GONZALEZ, test-student23@gmail.com, 1234567890, 7780908, ASSIST Demo School, and Temporarily Locked. Below this, a message reads: "Please selection information to move from Application to Student file:". The interface is divided into three main sections: General Information, Address, and Parents. Each section compares data from the "Application" and the "Student" file. In the Parents section, a warning message states: "Parent's email address testparent1@gmail.com matches more than one existing parent's email address. Please select one to merge." The Parents section lists three entries with radio buttons for selection, and a "Create new" option at the bottom.
