Transcript Features:

ADLS continues to improve our dynamic and flexible transcript. Users can now add or view the transcripts with the following criterion:
- View the date a course was completed
- View the courses by School Year
- Hide or show weighted GPA (school preference)

**Administration Features:**

- **Student Status**: We have implemented multiple student statuses to help improve organization. Temp lock status does not affect student enrollment, but allows the admin to enter a custom note on the reason for the temp lock. Administration can run reports based on all statuses under the Roster Report.

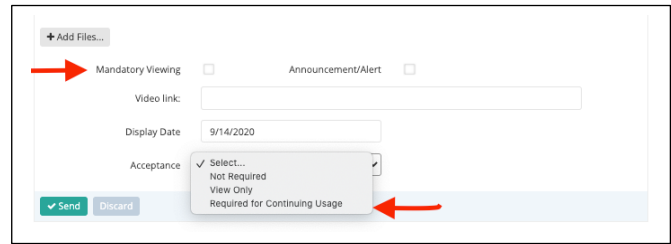

- **The location of the status button** has also been moved to the top of the screen next to the "Actions" menu

- **To assist schools in uploading the following: Students to ASSIST, sections to ASSIST, enrollments to sections, and transfer grades,** we have enabled downloadable spreadsheets for administration. Information can be uploaded to the system from these spreadsheets. The is located in the Administration Menu.
- **Compliance Messaging:** Administration can be given a permission to send documents that must be read and accepted by the user to gain access to the system. These acceptances are recorded in the compliance log in the Administration menu. This is ideal for honor code policies, or financial terms.
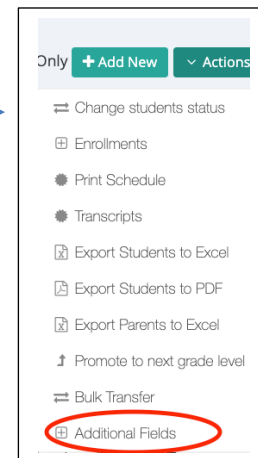

- **Compliance Log:** Administration can now download the Compliance Log to a spreadsheet
- **Attendance Upgrades:** Administration can now view attendance by specific sections, and by sections that have not taken attendance.

- **Additional Fields (Student Tags)** can now be added, or removed, to multiple students at one time via the bulk actions menu in the student's tab.
- **Creation of a section: Primary and Secondary Teachers.** Schools can choose to separate teachers in sections by *Primary* or *Secondary*. Only primary teachers will be visible on student and parent portals.

- **ASSIST Time Out:** ASSIST will prompt you to log back into your account if 2 hours has gone by with out activity

- **Translation**: Italian has been added to the languages that ASSIST translates to.

- **Messaging upgrades:** Users can now drag and drop images from their desk top directly to their message content.
